Humorous Themes and Development in Late 20th-Century Digital Literature

By Al Lowe

Hair has always been one of Larry’s downfalls (pun intended). Follow the numerous references throughout all the games to hair loss, wigs, barbers and baldness. Carefully study my photo on the back of the box. Draw your own conclusions.

Weight loss is another sore point with Larry. Like many of us, he’s perpetually fighting his own “battle” of the bulge. Again, check my photo. (Where do I get these ideas?)

Note the multiple clever references throughout every game to the ubiquitous Ken (AKA Kenny, Chief Keunewuuwau, etc.) Many reviewers and critics think these are thinly veiled references to Sierra founder and CEO Ken Williams. Preposterous. Others accuse me of “tucking up to the boss.” Ridiculous. Some say I have no imagination for names. Possibly. I like to think of it as “one less person that could sue me for using his name.”

Women’s names have been another fun point. Since Larry deals with so many women, it quickly became obvious I needed help coming up with fresh, funny names. Larry 1 was produced around the time of the Oliver North hearings. So “Tawny” seemed a natural name for a character. Larry 3 had lots of women so I made their names all end in “L.” Bambi, Nuts, etc. By Larry 6, I was so desperate I sank to disguising the names of wives: Charlotte Dornay, Cawarich! Varenz, etc. Fortunately, no one ever noticed.

Another example of evolution is “The Leisure Suit Larry Theme Song.” It’s especially been fun to hear my little ditty change over the years as each new composer gives it his own treatment. By the way, it is still awaiting lyrics. Submissions will be accepted gladly, but not acknowledged!

Somewhere I read you should never see a movie with a Roman numeral in the title. That’s why I’ve been careful to ensure all the Larry Sequels use Arabic numerals.

Dear Leisure Suit Larry Fan Club Initiate:

Thank you so much for purchasing "The Absolutely Totally Complete & Thorough Compilation of the Life & Times of Leisure Suit Larry Laffer" (or, as we like to call it internally, "Frifried Larry"). You'll be proud to learn your purchase qualifies you for a free "International Gold Level" membership in The Leisure Suit Larry Fan Club, bringing with it all the rights, privileges, duties, and responsibilities thereof unto this very moment.

The good news? No more waiting for us to sell you! From now on, each month you'll just send your $80.00 membership dues to the Fan Club's post office box, and you'll receive one of Leisure Suit Larry's "Special Surprises." (Unmarked bills only; please no stamps. We guarantee you'll be surprised, all right!) Newbies often ask me, "How did you get this?" I say, "Well, you know, we're all in it together, right?" To which I always reply, "That's Mr. Love to you!"

In truth, the actual story was even more fascinating. Leisure Suit Larry was discovered, lurking inside my brain, fully-formed, waiting to get out, back in the winter of '87. It took six months in the delivery room, sitting before a state-of-the-art X3 turbo (and some sterile gauze), to lose him upon an unsuspecting planet. (I like to say it was a drug-free, natural birth, but that's only half true.)

You're probably wondering why it took so long to assemble this collection. It's simple: over the years I've been asked to do many Larry collector's editions, Larry software compilations, Larry souvenir coffee mugs, a line of Larry beach wear, even Larry velvet paintings. But it all seemed so exploitative... That is, until Sierra's founder and CEO, Ken Williams, gave me the chance to produce a collection in the only way I would want it done. "We'll give you a piece of the action," Ken said. The rest is history in your hands.

I truly hope you'll enjoy tracing the development of the modern American kind-of-hero, Larry Laffer. Revel in the joy of knowing you have every possible bit of Leisure Suit Larry. Now get out of the house! It's a nice day outside.

Sincerely,
Al Lowe

### A Word About the Contents

**There are numerous fabulous perks to owning Leisure Suit Larry's Greatest Hits and Misses:** You get some fabulous games, from classic to state-of-the-art. Software, the next adventure that begat Larry and thrust Sierra On-Line into national prominence, is included. You'll find Larry 1, 2, 3, 5, and 6. (What's that? Where's Larry 4? That's a whole other story. Write to Al Lowe, care of Sierra's corporate offices, and ask him about it sometime. No, wait, on second thought, DON'T!)

### Another Word About the Contents

Inside this incredible book you will find copies of the original documentation that were actually sold with the first release of these hilarious games. These important pages are full of information and copy protection, which are critical to you playing each game. So reference each section very carefully, and do not lose, tear, staple, or mutilate. (Okay, you can mutilate if you want to, please just do it behind closed doors.)

### The Evolution of Lizardum Loungeus

Times change, technologies change. Back in 1989, when Larry burst upon an unsuspecting and still-reeling America, he was a modest, almost unassuming EGA smile and his four-plex leisure suit. As you play the EGA version today, you might find the graphics as dated as the word "groovy," but you should consider the games within context. This collection is an important historical retrospective at least in Larry's mind. As you travel back through time and technologies, please reflect on the fact that, although every single thing in the world changes, the exception to this rule is that Larry Laffer strikes out in 16-color, chunky graphics just as he does in gorgeous, state-of-the-art, 256-color aromonization.

The point is, Sierra's software technology was then and is a product of the times. When you play the EGA version of Leisure Suit Larry in the Land of the Lounge Lizards, you might say to yourself: "No music, Bummer." But keep in mind that sound cards weren't even invented when Larry presented his first virtual woman, so it would've been impossible to hear his offensive come-one-on. The Collection's oldest games seem dated because Sierra's commitment to bringing you the latest in computer advancement means the cutting edge of technology keeps moving forward.
Parser vs. Point-and-Click Interfaces

The Parser Interface: Leisure Suit Larry 1, 2, and 3

The Larry series began as did so many other enduring computer classics: with a parser interface. When working with the parser, the player types instructions at the cursor on the screen. If, for example, you'd like Larry to drink poison, you simply type DRINK POISON. If the parser recognizes the words, Larry will comply by drinking the poison. If the parser does not recognize the words, Larry won't comply. In that case you might try different words like DRINK BEVERAGE, CONSUME LIQUID, or even DIE, LARRY, DIE!

The result of Larry's actions may be good or bad. If you type DIE, LARRY, DIE! and Larry does it, the gong will ring and Larry will die. But if you type DRINK BEVERAGE and Larry drinks it, you'll get the message, "Actually, Larry may be better off not drinking that."

That's why we have saved and restored features. So SAVE OFTEN, and you will avoid potential dead-ends.

Note that the ultimate parser game, Softporn, is included in this collection. Softporn is a text adventure, the precursor to the 3-D adventure game, and responds only to two word sentence structures. Use very simple sentence structure when speaking to this interface: "verb noun" probably works quite nicely.

Leisure Suit Larry 1, 2, and 3 are parser games. The Larry 1 VGA remake, Larry 5, and Larry 6 utilize the point-and-click interface. Be sure to utilize every entry on the pull-down menus. Always try to hide something funny in there.

Icons and Cursors: Larry 1, Remake, 5, and 6

At the top of the screen is an icon bar containing several icons that can be selected to execute the command choices available to you.

Using a Keyboard

- To position the on-screen cursor or move your game character using a keyboard, press a direction key or the numeric keypad.
- To stop your character, press the same direction key again, or press 5 (the key in the middle).
- To execute a command, type it and press [Enter].
- Access the menu bar by pressing [Esc]. Use the arrow keys to move through the different menu selections, then press [Enter] to choose one.

Using a Mouse

- To activate the icon bar, move the cursor to the top of the screen.
- To position the on-screen cursor, move the mouse to the desired position.
- To move your character, position the WALK icon at the desired screen location and click the mouse button.
- To execute a command, click the left mouse button.
- Try the right and center buttons too. They help you change cursors.

Using a Joystick

- To position the on-screen cursor using a joystick, move the stick in the desired direction.
- To execute a command, press the FIRE button.

To open the icon bar, move the mouse cursor all the way to the top of your screen.

Note: There may be slight variations in the appearance of icons from game to game. If you are unsure of an icon's purpose, click the HELP symbol (the question mark located at the right end of the icon bar), then click on the icon in question. In Larry 6, pull down HELP and choose "Interface." Then just pass the cursor over the screen.

Windows Installation:

1. Insert the Leisure Suit Larry's Greatest Hits and Misses! CD into your computer's CD-ROM drive.
2. Start Windows.
3. In Program Manager, pull down the [File] menu and select [Run].
4. At the command bar, type the letter of your CD-ROM drive, followed by "ISETUP.EXE" and click OK or press [Enter].
5. Click on [Install] and follow the on-screen prompts.
6. Click on the "Readme" icon for the latest information.

MS-DOS Installation:

1. Insert the Leisure Suit Larry's Greatest Hits and Misses! CD into your computer's CD-ROM drive.
2. Type "X:" where X is the letter of your CD-ROM drive (for example, "D:"), Press [Enter].
3. Type "INSTALL" and press [Enter].
4. A menu will appear. Select the letter corresponding to the game you wish to install, and type it at the prompt.
5. Follow the on-screen prompts.

IMPORTANT: All individual games must be installed to the same drive on which Leisure Suit Larry's Greatest Hits and Misses! was initially installed. (In other words, you must install everything to the same drive.) If you experience difficulty trying to install under Windows, you may want to install under DOS. Then again ... maybe not.

Leisure Suit
In the Land of the Lounge Lizards

A 3-D Animated Adventure Game

Leisure Suit Larry is a hilariously cringeworthy 3-D animated adventure game by Sierra On-Line. The protagonist, Larry, is a timid and awkward man who finds himself in various situations where he must overcome his social insecurities and navigate his way through life. The game is known for its explicit humor and adult themes, which were groundbreaking for its time. The story involves Larry's attempts to make his way up in the world by attempting to become a successful businessman, all the while dealing with various personal and professional challenges. The game's appeal lies in its relatable characters, unexpected plot twists, and its ability to tackle serious issues with a light touch. This version, known as Leisure Suit Larry 4: In the Land of the Lounge Lizards, was released in 1992 and is considered one of the most memorable and iconic titles in the Leisure Suit Larry series.
Leisure Suit Larry I VGA: In the Land of the Lounge Lizards

In 1991 we had a brilliant idea: people continue to buy classic books, movies and videos year after year; surely they would also buy classic computer games as long as the graphics didn't look dated. So we had Bill Shirvan and crew create all new backgrounds and animation in the then-new VGA 256-color 320x200 format. We had Oliver Breisnad et al reprogram the game, substituting Sierra's new point-and-click interface for our old "type-'til-you-bleed" parser. I created hundreds of new lines everywhere possible. New graphics, new interface, new laughs? Surely, this would breathe life into the old boy!

That's how we learned: games aren't books, movies or videos!

Nested in the bush just shooting distance from warm, steaming Beaver Creek, the bizarre yet strangely satisfying MYSTERY HOLE beckons:

PLUNGE headfirst into the swirling Backdoor Basin!

SQUEEZE into the wonderful Messy Pinnacle at the end of Skidmark Trail!

SPEND 5 minutes in the disorienting Tumbling Tunnel... when you get home, you'll swear to your friends it took you an hour-and-a-half!

SEE objects well 5 TIMES THEIR ORIGINAL size... Then, just as mysteriously, vanish back again!

You've never seen anything like it!

How did the Mystery Hole come to be?
Nobody's quite sure.

 Psychic Investigators have studied the Mystery Hole and left scratching themselves. Scientists have probed the Mystery Hole with their instruments and emerged shaking their heads.

All we know is that everybody who explores the Mystery Hole's secret cavities wants to come again and again and again!

Leisure Suit Larry 2: Looking for Love (In Several Wrong Places)

Rationalizing our approach in Leisure Suit Larry, we decided to focus on the needs of our loyal fans. We wanted to create a game that was more logical and less reliant on the offbeat humor that had defined our previous efforts. Our goal was to create a game that was more accessible and less controversial.

Actually, Larry 2 is a really good adventure game, better puzzling and more logical than Larry 1, with some wonderful running gags. The development system finally allowed us to store and reuse strings loops. I mean “typed phrases.” So I included an item on the pull-down menu bar called “Type Phrase.”

This game began the running jokes about Larry’s life-saving skills. There must be a half-dozen references in the game, each of which excites Larry in some fashion. [See Page 16, Restaurant Themes and Developments in Early 20th-Century Digital Literature.]

Larry 2 was also the beginning of my long collaboration with Bill “Missing Link” Skirvin, the perfect art director. Bill loved to hide strange and often obscure objects in background paintings. He was meticulous in any detail of these pictures or you might lose your L. Larry.

I had great plans for a big finale to this game but by the time we got around to programming the end of the game we were out of disk space (not to mention time), so much of the ending scene is on “auto-play.” At least I got to introduce Penelope Pillars, who would return to play a major role in the next two games.

Warning: Be especially careful of the parser when you reach the top of the volcano near the end of the game. A subtle bug was introduced the night before we shipped that requires the word “I’m” be used in your typing. So where you could normally get by with typing a phrase like, “Put bottle in bag,” here you must type, “Put bottle in the bag” instead. I didn’t catch the bug because my goal was to make those games recognize complete proper English sentences instead of “adventure game-ese” shorthand. The bug was fixed shortly after the game shipped, but to the best of my knowledge, Sierra never got around to updating the shipping version. Oh, well.

AN OVERVIEW
A Sierra 3-D Animated Adventure Game, simply stated, is an interactive movie where you become the main character. In this game, the main character is "Leisure Suit" Larry Laffer, a would-be man-about-town with a receding hairline and no redeeming social values.

Each 3-D Animated Adventure Game has a goal, and as Larry, yours is a very special one.

You see, Larry has been single for a long, long time. Life as a swinging single has been unfulfilling (and unsuccessful). It's time to find a long term relationship. Someone with whom to spend his declining (and reeding) years.

Leisure Suit Larry is looking for the holy grail of the singles bar scene. Larry is looking for the girl of his dreams, his soul mate, his long term relationship!

LEISURE SUIT LARRY GOES LOOKING FOR LOVE!
(In Several Wrong Places)

HOW TO INTERACT WITH THIS COMPUTER GAME

1. HOW TO MOVE AROUND
Identity your character on screen (he's the balding nerd in the white leisure suit). You can move Larry through use of a joystick, mouse, the numeric keypad or direction keys on your computer. Check your reference card for full details.

If Larry bumps into anything (barstool, girl, etc.) he will stop. You must maneuver around the object. When Larry reaches the edge of any screen, a new scene will be loaded from the floppy or hard disk. If Larry reaches the edge of a screen and a new scene is not loaded, you have reached a boundary of the adventure game world. An example of this is to try to go left or down from the opening screen of the game.

2. HOW TO CONVERSE WITH THE GAME
TEXT MESSAGES (from the computer)
Throughout your adventure, the computer will tell you about the situation you are in than would normally meet the eye. This text comes up in a message window on your computer screen. To clear a message from the screen, press ENTER or the mouse or joystick button.

TEXT ENTRY (your input to the game)
When you want to do something, such as "talk to the cute receptionist," or "get the handcuffs," type simple, complete English sentences. A dialog box will appear when you start to type. Press ENTER when your instructions are complete. For more information, see your reference card under the headers WINDOWS and INTERACTING WITH THE GAME and TIP #4 UNDER TIPS FOR NEW ADVENTURERS.

3. ACCESSING SPECIAL OPTIONS (Pull down menus)
Sierra 3-D Animated Adventures feature an array of special options designed to enhance your gaming experience. These options are available by accessing the pull down menus at the top of the game screen. On most machines, use the ESCAPE (ESC) key and direction keys or the joystick or mouse.

4. SAVING AND RESTORING A GAME IN PROGRESS
Every Sierra game product offers a special save and restore game feature. Saving a game is much like putting a bookmark in a book. Your position in the game, including your location, your possessions, and your total point score, is saved to disk for future use. You may use this option whenever you want to take a break from playing your game, or whenever you are about to do something you think you might regret later.

A wise adventurer saves his game often. The world of Leisure Suit Larry is filled with potentially lethal situations. Whenever you get killed, locked up in prison for life, or otherwise stopped in your quest, you can restore your game to a past bookmarked point and proceed in your adventure again. For more information on save and restore functions, consult your reference card.

SPECIAL TIPS FOR BEGINNING ADVENTURERS

1. LOOK AT EVERYTHING
Every time you reach a new screen in your game, type "Look at the scene." Look at everything you can identify in each screen.

For instance, in a bathroom you would "Look at the room," then "Look in the mirror," "Look at the sink," "Look at the toilet," and even "Look in the toilet." (Yuck!) The descriptions you get when you look at things can give you valuable clues that will help you in the game and can sometimes be very funny too.

2. KEEP AN EYE ON YOUR INVENTORY
Adding items to your inventory (collecting things you find as you play) is a major part of any adventure game. You never know when a rope, a shoe string, or even a banana peel can come in handy.

When you find something that you think might be useful, type "GET THE ......." If you can't get the item you are trying to get, the game will tell you.

Sometimes, the game will allow you to pick up things that could be detrimental to your progress. If, for example, all the characters in the game begin running from you with their hands on their noses, you may want to drop that rotten fish you found on the seashore.

3. PLAY WITH A FRIEND
When it comes to playing adventure games, more heads are better than one. You may find it very helpful (and more fun) to play this game with a friend.
4. A FEW CHOICE WORDS
This 3-D Animated Adventure Game understands a wide variety of verbs, such as:
ASK      DRINK      HELP      LOAD      PUSH      SWING
BEAT      EAT       HIT       LOCK      READ      TAKE
BITE      ENTER      HOLD      LOOK      REST      TALK
BLINK      ESCAPE     HUG       MOVE      RUN       TASTE
BURN      EXIT       JUMP      NAME      REACH     TELL
BUY       FACE       ROCK      NORMAL      SEE      THANKS
CALL      FIX        KICK      OPEN      SHAKES    THROW
CLEAN      FRESH      LAUGH     PAY        SHOW      TURN
CLIMB      GET        LEAP      PLAY      SMOKE     UNLOCK
CLOSE      GIVE       LEAVE     POCKET     BREAK     WAIT
CROWN      GROW       LIGHT     PULL      SPLICE     WAVE
DANCE      HELLO      MADE      PUNCH     SPRAY     WHIRL
DIVE

5. YOU'RE GOT TO BE OPEN-MINDED
If it's silly, rude, dirty or funny, Al Lowe probably thought of it when he was designing this game. Some of the puzzles in this game require deranged thinking to solve.
When confronted with a problem in the game, try anything and everything. After all, no one ever got a social disease from their keyboard, and you have your RESTORE GAME function if things really backfire on you.

6. IF YOU STILL CAN'T FINISH
Feeling frustrated? Can't seem to finish what you start? Is your wife making fun of you?
Even the best adventure gamers sometimes can't complete their tasks.
Leisure Suit Larry 3: Passionate Patti in Pursuit of the Pulsating Pectorals

The end of "The Larry Trilogy," I fully intended the series to stop with this game. In fact, during the last month of development, I remember someone asking me, "What are you going to do for Larry 4?" to which I replied, "Nothing! There's never going to be a Larry 4!" Pretty damn prophetic, eh?

By this time, no one was playing from floppies any more, so we demanded a hard disk, built the entire game fits in under 1 megabytes.

This game saw the addition to the Larry gang of Carlos Escobar and Roger Hardy, both of whom were dumb enough to work with me again in the future. Carlos had an honorary cameo role in Larry 2 as the brother of the ship's cook and you only saw him if you repeated something really when the maid was in the room, so I'm sure most of you never saw him.

Leisure Suit Larry 4: The Missing Floppies

What is the truth about why I skipped Larry 4? Was I trying to catch up with the Space Quest guys? Nah. Did I write a game too dirty to ship? No. Were the floppies really stolen by Borderland and released as "What in the hell is Leisure Suit Larry?" NO!

Leisure Suit Larry 5
Passionate Patti Does A Little Undercover Work
Leisure Suit Larry 5: Passionate Patti Does a Little Undercover Work

Dating from way back when "I've got it. People, really want games that are like little novels," period, Larry's generally considered funny with a good plot, but consistently disliked by computer game magazine reviewers and professional game players as too easy. On the other hand, most "hardcore" people I've talked with said it was the only one of the games they could finish. Go figure.

Larry 5 was my first game (and not the last) to make use of the Body Function Keys. For a demonstration, just press the numbered function keys on your keyboard (try FIG. 1 to start). We added these about three days before we shipped because it was late at night, we were tired, and we were out of caffeine and pizza, we were all Lenovo fans, it seemed like a good idea at the time, and we could. Not even the game reviewers noticed.

This game introduced the "new look" of Larry. More modern, angular, artistic. We call it "whacked out." It gives the game a fun feeling, even when nothing funny is happening.

If you forget your password, or never even enter one, do this: First, find the sub-directory where the game is installed (probably C:\WINDOWS\AERODORK); delete the file "MEMORY.DRV." That's where we had the password. (Pretty sneaky, eh?)

AERODORK AIRLINES

"Fly the Proud Dork!"

SEXY, THUGS AND ROCK 'N ROLL... They're back in their wildest, sexiest adventure ever. Larry teamed up with Passionate Patti for a cell-Phone guided bombing coup through the sleazy underside of the underworld between Larry and Patti. Double the trouble, double the fun!

IT'S LARRY & PATTY VS. A GALLERY OF GOONS: Passionate Patti is a fledgling spy for the FBI, who's broken into the music industry, Larry, cult-hero of the computing age and satirical fashion. "The Mob wants to get pornography off the air and back onto their balance sheet. Help Larry and Patti take an organized crime, the FBI, and the CIA in a" mission. Everything in their so-called computer "game"...

Leisure Suit Larry 6: Shape Up or Slip Out!

In some ways, a return to the original. With Larry 6, I wanted to provide an area where the player could roam around and see almost anything within the first few minutes of play, and yet provide enough depth of play that the game could challenge most players.

To Windows or Not To Windows?

If you have a Windows operating system, you need to install the "Laffer Utilities" software before you can play the game. Otherwise, you can use a simple computer keyboard or joystick to play the game. The game is compatible with Windows 3.1 or later versions.

Tips for Beginning Gamers

If you are new to computer gaming, you might find the "Laffer Utilities" game challenging. Here are some tips to help you get started:

1. Read the instruction manual carefully before you start playing the game.
2. Practice playing the game several times to get familiar with the controls.
3. Try different strategies to see what works best for you.
4. Take breaks when you feel overwhelmed to avoid burnout.

Things you may not know...

1. The game has three levels of difficulty: Easy, Medium, and Hard. You can select the level that suits your skill level.
2. The game has a scorekeeping feature that keeps track of your progress.
3. There is a hint system that provides tips and strategies for the game.
4. The game has a built-in tutorial mode that explains the game rules and controls.

The Laffer Utilities

Cleverly titled to be a play on "The Norton Utilities," a famous disk utility
program known to nearly every computer user on Planet Earth at the
time, we outsmarted ourselves by failing to realize that nobody except us knew Leisure Suit
Larry's last name was Laffer! Thus nobody caught the pun! Ha, ha, huh?
The joke was on us.

Actually released about a year ahead of its time, TLU was passed before most
people were even able to use it. It was the first software that lets you "waste
time when you should be working." Its slogan was: "Automate everything you
do at the office that has nothing to do with work! It includes clip art, a betting
pool printer, a joke database (pre-loaded with 700 of my favorites), an automatic
sign maker that actually works well, and more. It even solves the most often asked
question around the office "Where do you want to go for lunch?"

Congratulations on your purchase of The Laffer Utilities! TLU is designed to maximize office productivity and eliminate downtimes. We recommend you purchase TLU for every computer in your office; once installed throughout a company, the effects will be immediately obvious. (Morale may even improve!) TLU has been called "...an Office Manager's Dream" (PC Week), "The most revolutionary office utility program ever created" (Kurkus Software Reviewer), and "a must-have for all offices...simply incredible, really terrific, and not in the least a time-wasting series of silly-ass programs to use with your computer while the boss isn't looking." Crazy Nick was looking for software bargains to feist off, er, that is, "offer to" the public. Following hot on the heels of the successful "Ms. Astro Chicken Collection" from Space Quest, Nick convinced some unsuspecting programmer to slip together all the gambling games I had written for the Larry series and cram them into one disk for less than ten bucks retail.

It was a perfect Mother's Day gift.

— A.L.

Softporn Adventure

Softporn was written in 1981 (the Paleolithic period of computing) for the Apple II computer and is, to this date, the only game Sierra has ever published that has absolutely NO graphics. When Time Magazine published its first column on computers, the photo it ran was the cover of Softporn. When there were only 100,000 Apple II computers in the world, Sierra had sold 25,000 copies of Softporn! It was, to say the least, a phenomenon in the early days of microcomputers.

But, the state of the art then was much different from the state of the art today. It was a "simpler" time (i.e., you had to work a lot harder because the computer doesn't). So, don't expect much in the way of forgiveness or user friendliness here.

Freddy Pharkas, Frontier Pharmacist

We've included a demo game of Freddy Pharkas, Frontier Pharmacist for you to play and enjoy. It's now available on CD. If you like it, I hope you'll buy the game. I think it's one of the funniest games ever but unless it sells lots and lots of copies, Sierra won't let me do the sequel (which is even funnier!). Seriously, load this up and see just how great games can be when you hear the voices of professional actors!

From the desk of Larry Laffer

Al Lowe is widely acclaimed for single-handedly corrupting the computer industry, with his "Leisure Suit Larry" games. Al created the "adults only" category of computer games.

In the process, he also created a lot of controversy. The State of California introduced a "Leisure Suit Larry" bill which would have prohibited adult themes in any computer game. Fortunately, legislation died in committee, thanks to the diligence of the software industry (and possibly the legislature's strong demand for a sequel!)

Ask Al to comment on the rumor he's created and he'll give you a quick smile and a hearty "Thank you" before conveniently forgetting the question.

So what was Al's motivation to design "Leisure Suit Larry"? Simple.

"I just went to make people laugh."

In truth, Al Lowe can't understand what all the fuss is about. He doesn't think Larry is all that risque. "Larry is just a ladies-man-warmer." He's equal parts Don Juan and Don Knotts. The result? Larry is every girl's blind date nightmare!

All stresses that he "just wants to be funny." What if the humor does occasionally come across as "a bit off-color" or "just a little dirty"? Al shrugs, explaining, "the world can be a dirty place." Evidently, the world can also appreciate a little dirt. As the Larry games are sold on several continents in several languages and have been featured in such wide media as Entertainment Tonight, Rolling Stone, The New York Times, The Wall Street Journal, Playboy, Penthouse, The London Financial Times, and more.

All this from a man with a Master's Degree in Education who taught music for fifteen years. He still plays music professionally, although he finds Larry consumes more and more of his attention.

Larry is currently in its fifth installment, which with his typical saucy humor, Al has named Leisure Suit Larry 6: Shape Up Or Slip Out! The Larry games are one of the best selling computer game series of all time.

Sierra is proud of its contribution to improving the morals of America's youth, not by hiring Al to design computer games, but by keeping him out of public schools.
