DOS INSTALLATION

1. Place the *Space Quest 6* CD into your computer’s CD drive.
2. Type the letter of your CD drive, followed by a colon. For example, if the letter of your CD drive is “D”, type “D:”. Press [Enter].
3. Type “Install” and press [Enter].
4. Follow the on-screen installation instructions.
5. Be sure to check the “Readme” file for the latest information.
When the game is started, you will see a screen with your choices listed. They will be:

1. Start a New Game. Click on this button to start a new game.

2. Continue a Game. Click on this button to continue a game you’ve already started. You will be asked to choose which game you’d like to continue from a list of your saved games. This option will not be available until you’ve saved a game.

3. Quit. Click on this button to quit your game. You will be asked to confirm the choice.
THE INTERFACE

THE ICON BAR

The icon bar appears across the bottom of the screen. Your cursor choices appear as words, and consist of the following:

- **FEET**: Walk
- **EYES**: Look
- **HANDS**: Take, give, or otherwise manipulate
- **MOUTH**: Talk
- **HELP**: If you don’t know, push this button
These are also available from the icon bar.

POCKETS  INVENTORY

CONTROL  GAME CONTROLS

At the far right your score will appear. The rectangle in the bottom right corner of the screen is your inventory box; your most recently selected inventory item will appear here.

THE CURSOR

The cursor is what enables you to effect an action on-screen. With the cursor you can pick an item up, walk over to something, examine an object, or talk to someone. The sensitive part of the cursor is at the top point. If you wish to look at an object, for example, click the cursor on the eye which appears on the icon bar. The eye will now appear in the cursor. Position the cursor with the top point on the object you wish to examine. Now click on the object. Voilà!
INVENTORY

Experienced players know that adding objects to their inventory is the secret to ... having a big inventory. Be sure to lift everything that isn’t nailed down. In order to pull up your inventory box, click on the POCKETS icon.

Taking Inventory Objects. If, in the course of playing the game, you come across an object you would like to acquire, click on the HAND icon and then on the object. If it is available to you, it will move to your inventory.

Examining Inventory Objects. You can examine inventory objects by clicking on the POCKETS icon on the icon bar. When the inventory box appears, click your cursor on the EYE, then click on the object you’re interested in. You will now be given more information about the object.

Manipulating Inventory Objects. If you wish to manipulate an item in your inventory, click on the HAND cursor and then the
item you wish to manipulate. If the object can be manipulated, it will now reflect that change.

**Combining Inventory Objects.** Some inventory items can be combined with others to create a new inventory object. To do this, click on the CHOOSE icon and then on an inventory item. The cursor will change to resemble that item. Now click that cursor on the inventory item you wish to combine it with. If the two objects can be combined, they will become a new item, which will appear in your inventory.

**GAME CONTROLS**

Traditionally, Sierra has provided a controls icon to give players that oh-so-comforting illusion of control. *Space Quest 6* offers a new concept in controls icons: we actually give you control. From the game controls you can do the following:

- SAVE A GAME
- CONTINUE A SAVED GAME
- FIND OUT ABOUT *SPACE QUEST 6*
GET HELP ON THE OTHER CONTROLS
SWITCH TO SPEECH, TEXT, OR BOTH
TURN THE SCROLLER ON OR OFF
QUIT THE GAME
ADJUST THE SPEED, DETAIL, OR VOLUME OF THE GAME
CHANGE THE SPEED THAT THE TEXT MESSAGES CLEAR

SCROLLING
As you travel through the exciting worlds of Space Quest 6, you'll notice that when Roger walks off the edge of one screen, a new screen appears with Roger in it. Some screen shifts, however, are handled differently. In the Orion's Belt bar on Polysorbate LX, for example, when Roger walks to the edge of the screen, you will see him continue to walk as the background screen moves, or "scrolls," behind him. When SCROLLing is turned off, the screen will change in the usual way. If yours is a less powerful computer, you may find that switching off SCROLLing on the Control Panel will speed up the game.
Space Quest 6 provides you with a world to explore in detail. In any given room there might be an item you need, a hidden entrance, or a puzzle’s solution. So look around already! Click the eye on objects that look interesting. Click the hand icon on items that don’t look bolted down. Explore every nook and cranny. We want you to have as much fun playing Space Quest 6 as we had making it.
